

Supply Chain Management

Core Competencies

World-wide industry leaders strive to achieve world-class performance through Operational Excellence (OE). OE policies and procedures must be adopted at every level of the organization to achieve maximum results.

Tagos' Supply Chain OE team consists of professionals with extensive experience across a wide range of industries. Our team members have diverse backgrounds encompassing energy, manufacturing, retail, health care, and distribution. We bring decades of supply chain fundamentals and leading best practices from these diverse backgrounds to create and implement innovative solutions for our clients.

OUR COMPETITIVE ADVANTAGE

- We employ ONLY seasoned professionals who work hand-in-hand with you to lead your very complex operational and technical projects.
- Our overall costs remain far below those of the larger consulting firms by utilizing your existing talent to transform your operations.
- We deliver industry thought leaders to every project by drawing upon an extensive network of strategic partners who bring the industry's best thinking into an organization to guide the change.
- We don't just consult. We bring a hands-on approach to develop financial and operational strategies that ensure clients achieve world-class operations.
- Our senior experts deliver personalized solutions designed to engage all levels and functions of an operation and to drive enterprise-wide improvements efficiencies and financial returns.
- We listen to a company's leaders, found at every level of an organization, and we draw from their ideas to help develop the systems, processes, and tools to transform silo-driven operations to a system-wide focus on operational excellence.

OUR HISTORY

The Tagos Group was founded in 2007 as a supply chain integrator by a team of professionals with executive supply chain and corporate leadership experience in the energy sector.

With our extensive background in creating and implementing strategies and solutions for Fortune 500 companies, we soon attracted the attention and gained the trust of leaders across the energy sector. Our consistent delivery of excellent services, solutions, and value to our customers has impressed existing clients, who have continued to award us new business.

OUR VALUES AND MISSION

We strive to be a leading provider of supply chain services, oil field services, outsourced technology and procurement services, proppant, and concrete supplies that deliver sustainable and continuous improvements to our customers.

- Understand our clients' operational objectives and needs
- Recommend and implement measurable operational improvements
- Leverage strategic relationships for the benefit of our clients

Supply Chain Management

Core Competencies

OUR SERVICES

Supply Chain Strategy, Planning, and Control

Tagos works with an organization to ensure its supply chains are aligned with its business strategies. This synergy assures that materials and resources are delivered through the right business drivers and targeted metrics. Service offerings include: Major Capital Projects, Capital Spares, and Maintenance, Repairs, and Operations.

Procurement Process and Performance Standards

Tagos empowers clients to reshape their procurement departments from the traditional purchasing role to world-class procurement organizations that help grow revenue while reducing operating costs. Service offerings include: Strategic Sourcing, Category Management, Contract Administration and Compliance, and Procurement/Procure to Pay.

Materials Management and Control

Our materials management and inventory control professionals have decades of experience in operations as well as consulting. We work with global energy companies to implement leading best practices, processes, and performance standards across warehouse and materials management functions. Service offerings include: Item Master Management, Inventory Analysis, Receiving/Inspection/QA, Storing and Preserving, Kitting and Delivering, Data and Management, and Execution Monitoring and Control.

Logistics and Network Optimization

Supply chains are increasing in complexity as global sourcing accelerates. Tagos helps companies identify the most effective logistics network strategy combining the best use of the latest technologies available for network and inventory optimization with internally developed modeling tools. Service offerings include: Supply Chain Network Planning, Lane Optimization, and Customs and Document Management.

Project Management and Professional Services

Project management resources are often stretched too thinly in many organizations. From the inception of a project through its completion and post-project assessment, we deliver a disciplined and integrated approach to managing efforts of operational improvement using a standard but flexible PM methodology. Our professionals understand that projects require complex organizational interaction, and they are adept facilitators of cross-functional engagements. We work to integrate, coordinate, and achieve consensus across all levels of an organization, including direct and indirect project teams and steering committees.

We provide professionals to augment your staff both on a short-term and a long-term basis in the following areas: Project, Program, and Change Management, Steering Team Formation and Facilitation, Operational Efficiency Programs, Supply Chain and Logistics Projects, and Technology Design, Integration, and Deployment.
