OUR COMPETITIVE ADVANTAGE

- We listen to you and design solutions or provide resources to support your teams' individual needs.
- We understand the unique characteristics of several key industries and appreciate the complexities and drivers that are unique in project-based materials and equipment management for those industries.
- We employ seasoned professionals who work hand-in-hand with you to lead your very complex operational and technical projects. We never train our staff on your projects.
- Our focus is on your bottom line driven through safety, cost reductions, and efficient delivery of products and services to you and your customers.
- We leverage our experienced senior professional to deliver industry and non-industry best practices and solutions .

OUR HISTORY

The Tagos Group was founded in 2007 as a supply chain integrator by a team of professionals with executive supply chain and corporate leadership experience in the energy sector.

With our extensive background in creating and implementing strategies and solutions for Fortune 500 companies, we soon attracted the attention and gained the trust of leaders across the energy sector. Our consistent delivery of excellent services, solutions, and value to our customers has impressed existing clients, who have continued to award us new business.

OUR VALUES AND MISSION

We strive to be a leading provider of supply chain services, oil field services, outsourced technology and procurement services, proppant, and concrete supplies that deliver sustainable and continuous improvements to our customers.

- Understand our clients' operational objectives and needs
- Recommend and implement measurable operational improvements
- Leverage strategic relationships for the benefit of our clients

Supply Chain Management Capital Project Support Services

OUR SERVICES

Project Planning

Tagos works with clients to ensure project materials are defined and in accordance with company or customer standards. By involving Tagos early and imbedding us into the engineering and project planning processes, project delays can be avoided and cost overruns mitigated. Service offerings include turnkey capital projects, turnarounds or plant outage support, and new construction or retrofit projects.

Procurement and Expediting Support

Tagos' business model allows customers the flexibility of procurement staff augmentation to complete process outsourcing. We can leverage your current supplier agreements or source materials for you. Our services go beyond the traditional buying function into the project materials and equipment expediting roles. We understand that project profitability and delivery is dependent on delivery of the materials and equipment in a timely manner.

Materials Management and Control

Our materials management and inventory control professionals have designed and managed warehouses and storage yards, overseen supplier owned materials storage locations and have put in systems to support material visibility and prudent controls. Tagos has worked with global companies to implement best practices, processes, and performance standards across warehouse and materials management functions. We also understand and support the critical returns processing and accounting and the investment recovery processes involved in project work. Service offerings include receipt, inspection, storing, kitting and issue of materials and equipment.

Logistics Coordination and Optimization

Supply chains are increasing in complexity as global sourcing accelerates. Tagos helps companies identify the most effective logistics network strategy combining the best use of the latest technologies available for network and inventory optimization with internally developed modeling tools. Service offerings include supply chain network planning, lane optimization, track and trace solutions and customs/document management.

Material and Supply Chain Technologies

Tagos delivers deep technical knowledge and broad industry vision to build leading edge material and supply chain technology solutions. Tagos utilizes technology to support key areas of project management including interfacing with engineering, project managers, contractors and suppliers. Service offerings include master data management, cleansing and enrichment, advanced tracking/track and trace (RFID, GPS, etc.), procure-to-pay (P2P), eCatalogs and eCommerce, ERP/enterprise asset management, and custom web-based portal development.

Project Management and Professional Services

From the inception of a project through completion and post-project assessment, Tagos delivers a disciplined and integrated approach to operational improvement using a standard but flexible PM methodology. Our professionals understand projects require complex organizational interaction, and they are adept facilitators of cross-functional engagements. We work to integrate, coordinate, and achieve consensus across all levels of an organization, including direct and indirect project teams and steering committees. We provide professionals to augment your staff both on a short-term and a long-term basis. Service offerings include project, program, and change management, steering team formation and facilitation, operational efficiency programs, supply chain and logistics projects, and technology design.
